Our Mission

Bowen ParentLink

ALIGNMENT

- We work very closely with the school.

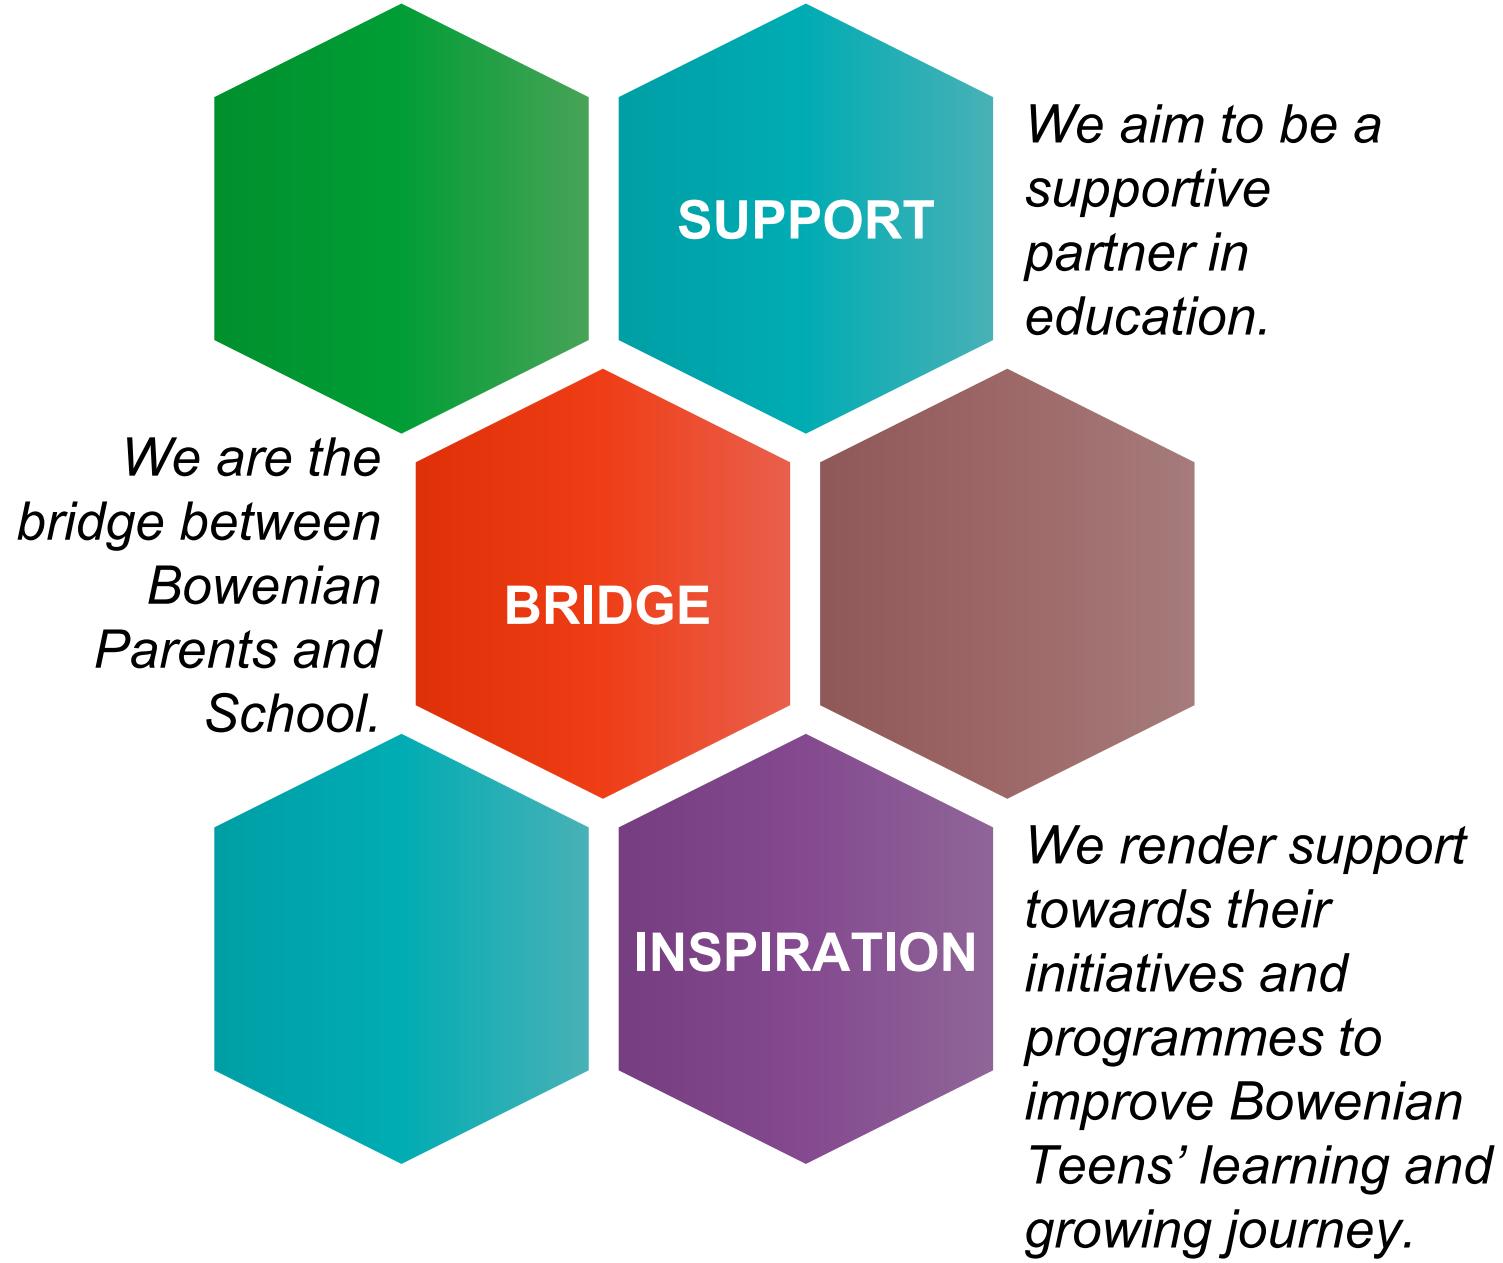

COMMUNICATIONS

- We ensure that our communications are aligned with the school's objectives..

SUPPORT

- We render support towards their initiatives and programmes to improve Bowenian Teens' learning and growing journey.

Our Vision

Bowen ParentLink

Our Success

Bowen Parent Link was commended by Dr. Maliki Osman, Second Minister for Education, in his speech on 18th Sept 2022. (Reference: [Click here](#)). Below is the abstract;

- “*This philosophy guides our thinking at the Ministry of Education, and it is why we encourage Parent Support Groups, or PSGs, to work hand-in-hand with our schools in their parenting journey. And if you are not already members of PSGs in your children's schools, please be one.*”
- “*The advantages are two-fold: On one hand, parents can pick up tips and insights from each other and better guide their children. On the other hand, positive school-home partnerships can help our children develop self-management skills, have ownership over their learning, develop a sense of purpose and build resilience. Our schools and parents can also work closely to support our children in pursuing their strengths and interests, and impart good values and attitudes.*”
- “*I will give a few examples of the good work done by some of our PSGs.*

Bowen Secondary School's PSG has also worked closely with the school to support their parents. They have a mentoring programme where fellow parents share useful tips and resources with one another. The PSG also helms a "For Parents by Parents" segment during the school's Meet-the-Parents sessions and holds Zoom sessions to engage parents in leading topics such as ways to build positive relationships with their children.

- “*To support all PSGs, MOE launched a Mental Well-being Resource Guide earlier this year with tips on how parents can be peer and resource supporters for each other. You can check our website for this Well-being Resource Guide. This guide is complemented by an online PSG repository that provides the most up-to-date resources that PSGs can refer to for their ongoing efforts to promote mental well-being among children.*”

<https://www.schoolbag.edu.sg/story/helping-your-child-navigate-the-online-world/>

The screenshot shows the Schoolbag website's header with categories like Preschool, Primary, Secondary, etc., and a search bar. The main title of the article is "Helping your child navigate the online world". Below the title is a short blurb: "Many parents worry when their children discover the Internet – who will their teens meet, will they view inappropriate materials or get cyber-bullied? Digital literacy expert Professor Lim Sun Sun shares how to nurture online savvy children." The author's name, "14 March, 2019", and a photo of Professor Lim Sun Sun are also visible.

Transition to secondary school

Students moving from primary to secondary school are entering a new phase of life. Learn about common challenges and how to help your child with the transition.

Help your child to understand the common challenges

Some of the challenges faced by students entering secondary school include:

- New school environment
- New friends
- New syllabus
- New phase of life

Your child has spent the last 6 years getting used to their primary school, and now they'll be going to a new school. Moreover, many of your child's primary school friends may be posted to different secondary schools.

Meeting new people can be difficult, but it's also an opportunity for them to form new, long-lasting friendships.

Your child will also be learning new subjects, including biology, chemistry, physics, geography and history. There will also be more subject choices, especially in upper secondary.

In this phase of school, your child will enter their teenage years and go through physical, emotional and mental changes. They will also begin to explore the different pathways available for them to fulfil their dreams and aspirations.
